

Asagai - Winter Wheat

EAR

Ear - glaucosity : strong to medium

Ear - density : medium

UPPERMOST NODE

Uppermost node - hairs : numerous to moderate

STRAW

Straw - wall thickness : thin

LOWER GLUME

Lower glume - external surface : rough

Lower glume - internal hairs : group I

Lower glume - beak length : medium to long

Lower glume - beak shape : straight to slight

Lower glume - beak tip : sharp

Lower glume - shoulder width : narrow

Lower glume - shoulder shape : elevated

LOWER LEMMA

Lower lemma - beak length : medium to long

Lower lemma - beak shape : slight

Lower lemma - swelling : medium to strong

APICAL RACHIS SEGMENT

Apical rachis segment - convex surface hairs : numerous, 2/3 area

Apical spikelet - upper glume beaks : abundant, medium short

Apical spikelet - collar hairs : moderate

Apical spikelet - lower glume beak gap : medium

LOWER GLUME

Lower glume - length : medium

Lower glume - width : medium

Lower glume - taper : medium to strong

Lower glume - spines on lateral nerve narrow wing : present, throughout

GRAIN

Grain - colour : red

Grain - length : medium

Grain - width : medium

Grain - shape : rounded

Grain - brush hairs : medium to long

ADDITIONAL INFORMATION

Auricles - pigmentation : absent
